

Math 10-3Q: Elementary Statistics and Probability (Includes required corequisite Math 210X-3Q) Fall 2019

Instructor: Kelly Lundstrom

Course Info: Math 10 – 3Q & Math 210X-3Q, TWTh 1:30 PM – 3:45 PM, Room ADM 103

Email: lundstromkelly@fhda.edu

Phone: 408-864-8910

Office: PE41h

Office Hours: Mondays 12:00 PM – 1:00 PM in S43

Tuesdays – Thursdays 8:55 AM – 9:25 AM & 12:50 PM – 1:20 PM in S43
& available by email (lundstromkelly@fhda.edu)

Textbook & Required Materials:

- Optional Textbook: Inferential Statistics and Probability by Geraghty. Free PDF will be emailed and posted on our Canvas class site.
- Required Workbook: Inferential Statistics and Probability Workbook: A Holistic Approach by Bambhania and Geraghty (print copy available for \$28.35 at De Anza Bookstore, or you may print your own copy or use electronically on a tablet)
- Required Graphing Calculator: TI-83/TI-83+/TI-84/TI-84+ (no cell phone calculators allowed!)
- Computer to complete online homework assignments and submit assignments on Canvas (Note: our campus has computers you may use for free if you do not own one)
- Blank paper – for classwork and the 60 second questions at the start of class

Grades: I will use Canvas to update grades regularly throughout the quarter. You should check your grade at least once a week. Go to deanza.instructure.com to log in and check your grade!

A *weighted* grading scale will be used as follows:

Homework (15%): There will be two types of homework assigned – **online and from the textbook**. Homework from the textbook will require you to write up your answers, neatly, so that I can follow and will be graded on accuracy and completion. If problems require any work, it must be shown to get full credit. Online homework will be submitted completely online at myopenmath.com and will not require work to be turned in. Homework will be assigned for each chapter. Due dates and homework assignments will be posted to Canvas. *Late homework will not be accepted unless accompanied with a No Questions Asked Pass.* Do not fall behind on homework. It is vital that you work on math homework each night to guarantee your success.

In-Class Participation (5%): Your attendance and punctuality will be required and rewarded! Expect a 60 second question at the start of most classes that you must complete and turn in for points. These will be on material covered in the previous lesson, so study your notes and complete homework before coming to class to be prepared. You will be allowed to work with one partner if you choose. Additionally, you will have group activities during class that will also count towards this category. *Missed in-class activities cannot be made up, regardless of your reason for missing class.*

Labs (10%): We will be using R, a free, open-source and very powerful statistical software tool for three in-class labs in the computer lab. It is recommended that you download R on your home computer as well, if possible, from this webpage: <https://cloud.r-project.org/>. Labs may be done in groups of up to three people and are due one week after they are assigned. Late labs will not be accepted unless accompanied with a No Questions Asked Pass.

Quizzes (10%): Announced quizzes will occur throughout the semester to test your skills on the concepts we are covering in class. You may use a 3" by 5" note card of your handwritten notes (both sides), and you will need a graphing calculator. NO make-up quizzes will be given, and a missed quiz earns a zero. I will drop your lowest quiz score.

Exams (40%): There will be three in-class exams during the quarter. You may use a full sheet of your handwritten notes (one side only), and you will need your graphing calculator. These exams will be completed in class and will contain the material covered during class. If you are unable to take an exam for any reason, **a makeup exam will not be given.** A missed exam earns a zero. I will replace your lowest midterm exam with the percentage of your final exam, provided it is higher.

Final Examination (20%): There will be a comprehensive final examination on **Tuesday, December 10 from 1:45 PM – 3:45 PM.** You may use a full sheet of your handwritten notes (both sides) and you will need your graphing calculator.

No Questions Asked Passes: This quarter you will be given 3 No Questions Asked Passes. Ordinarily I do not accept late homework assignments or labs. However, I do realize that things do come up that may keep you from completing an assignment. **If you do not turn in a homework assignment or a lab, you automatically receive a zero. If you would like to complete the assignment, you must email me at lundstromkelly@fhda.edu on the day the assignment is due and request to use one of your no questions asked passes.** You will be granted a 3 day extension and can earn up to full credit on the late assignment, provided you turn it in 3 days after the assignment was due. Any No Questions Asked Passes that are not used will be counted towards extra credit in the homework category. (Each pass is worth 10 points of extra credit. For comparison, each online homework is worth 30 points and textbook homework can be worth between 15-40 points give or take.)

Letter Grade Earned:

A+: 98 – 100%	B+: 87 – 89%	C+: 77 – 79%	D: 60 – 69%	F: 0 – 59%
A: 93 – 97%	B: 83 – 86%	C: 70 – 76%		
A-: 90 – 92%	B-: 80 – 82%			

Tutoring Services: The De Anza campus has a **free** tutorial center in S-43 for math students where students can get "drop in" help throughout the quarter. Additionally, if you want a personal **free** tutor throughout the quarter, you may request one, but please do so within the first week of the quarter as they get booked fast. Finally, I would love to help you in office hours. Please use your resources!

Student Conduct: Do not cheat. If you have a question during a test, you are only allowed to talk to the instructor. Anyone caught cheating on an exam will receive an automatic zero and be reported to the Dean of the PSME Division.

Classroom Behavior: Please do not use cell phones or other electronics during class. I do not want to hear or see them. If you must answer a call, please leave the room to do so.

Attendance: Students are expected to attend every class meeting and be on time. Missing even one day will cause you to fall behind. If you miss a day, it is your responsibility to seek out another student or myself to find out what you missed. ***You should always email the teacher ahead of class if you are to miss a class.***

Important Dates:

- The last day to add classes is Saturday, October 5.
- The last day to drop for a full refund no record of grade is Sunday, October 6.
- The last day to request pass/no pass grade is Friday, October 18.
- The last day to drop with a “W” is Friday, November 15.

Disabled Services: Please contact Disability Support Programs and Services (DSPS) if you have any physical, psychological or other disabilities, and also notify me privately. DSPS is located in ATC-209. **Any student needing accommodations must supply a written verification/exam form and give me at least 48 hours of notice.** I am happy to accommodate your needs.

This syllabus is subject to change at the instructor's discretion. Changes will be announced in class and on Canvas.

Student Learning Outcome(s):

*Organize, analyze, and utilize appropriate methods to draw conclusions based on sample data by constructing and/or evaluating tables, graphs, and numerical measures of characteristics of data.

*Identify, evaluate, interpret and describe data distributions through the study of sampling distributions and probability theory.

*Collect data, interpret, compose and defend conjectures, and communicate the results of random data using statistical analyses such as interval and point estimates, hypothesis tests, and regression analysis.
