

What If Audit

What-If audit allows you to process speculative degree audits against your current class history. You can audit yourself against the requirements for a different major and catalog year.

It is important to remember that What If audits are not stored in the database. After they are run, the results can be printed or saved as a pdf file. After leaving the What If screen the same audit cannot be accessed again. Of course, it is always possible to run another What-If audit with the same parameters.

If you are thinking of changing your major, DegreeWorks has provided the What If tool to enable you to apply your course history to a sample audit with any of these changes. This tool will also allow you to enter future courses to see how they will apply using the Look Ahead feature.

1) To access the What If option, click on the **“What If”** link on the left-side of the audit screen under the **“Audits”** tab

The screenshot shows the DegreeWorks "What If" audit interface. At the top, there are tabs for "Audits", "Planner", and "GPA Calc". The "Audits" tab is selected, and the "Format" is set to "Student View". There are buttons for "Process What-If" and "Save as PDF". The "What-If" section is highlighted, showing three dropdown menus: "Level" (De Anza Undergraduate), "Degree" (Associate in Science - DA), and "Catalog Year" (2008-2009). Below this is the "Choose Your Different Areas of Study" section, which includes a "Major" dropdown menu (Pick a Major) and a list box containing "MAJOR : Computer Aided Design-Mechanical DA". A "Remove" button is located below the list box. The "Choose Your Future Classes" section has input fields for "Subject" and "Number", an "Add Course" button, and a list box containing "CDI D051.62" with a "Remove Course" button below it.

2) Once at the What If screen, you will be able to use the drop-down boxes to select the desired Level, Degree, Catalog Year and Major , as well as add additional future classes to the audit scenario.

3) Your selection for each area will be added to a list box on the right hand side. If you would like to remove any of your choices, select it from the list and click the **“Remove”** button located below the list box. After selecting the desired criteria, press the **“Process What-If”** button. DegreeWorks will then take your entire course history and apply it to an audit with the newly selected changes. Any wrong combination of degree or major will result in an error. **Note: If you would like to print your What If scenario, click on the Print button before you click “Process What-If”**
