## Methodology

Year end financial aid extracts from the SIS / RMS system is merged with data from the Research Data Warehouse. The data warehouse contains demographic variables for students based on the student application. Data from the most recent application is used in this report. 200-300 students each year are found in the RMS extract but not the data warehouse (for various reasons). Thus the demographic counts do not always equal the year end figures from RMS.

A “financial aid student” is defined as a student receiving any type of financial aid over the course of the fiscal year, including scholarships, loans, and grants.
